
TIGER EYE BLUE

Antolini Precioustone

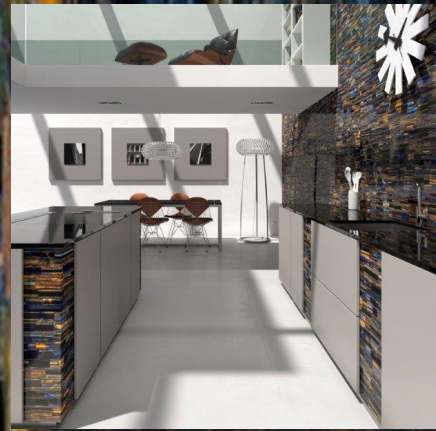

The stone of sound judgment, in medieval times it was used as a powerful amulet against demons and witchcraft. It protects the psyche and facilitates clarity.

Tiger eye is a variety of quartz characterized by chatoyancy – an optical effect that makes this mineral iridescent, much like the pupils of felines. The blue variety helps keep even the most difficult situations under control and maintain a sense of direction.

The largest deposits are in South Africa, Australia, India and the United States. The slabs and cut-to-size pieces suit all interior applications. This stone has natural painkilling power and is especially good for headaches.

To facilitate meditation and bring out initiative.
